Nr. 29.

H. Strand

Professor Embrik Strand:

Zoological and Palaeontological
Nomenclatorial Notes.

[*hier nur die "Mollusca"!*]

Sonderabzug aus:
Acta Universitatis Latviensis
XX. p. 1-29 (1929)

NATURHISTORISKA RIKSMUSEETS
EVERTEBRATAVDELNING
STOCKHOLM 50

Riga, 1929.

Swedish Museum of Natural History
Invertebrate Zoology Library Catalog number:

01 3689

391 (1927) has pointed out, will be a new species of the genus *Dispharynx*. This species may be named as indicated above.

(Acuariidae)

Dactylopodella Remane, Zeitschr. Morph. Oekol. Tiere 5. p. 625 sq. (1926), also in: Grimpe & Wagler, Die Tierwelt d. Nord u. Ostsee VII^d. p. 48 (1927) (nec *Dact.* G. O. Sars, Crust. Norway 5. fasc. 9/10. p. 131 (1905)) I rename *Dactylopodola* Strand n. n.

(Gastrotricha)

Gongylonema notosoedironis Strand n. n. In: Nederl.-Ind. Blad v. Diergeneesk. (Buitenzorg) 38. p. 2—94 (1926) Smit and Noto-soediro describe under the name of "*Gongylonema ingluvicola* Ransom?" a species, which as already Cram in: Bull. 140, U. S. Nat. Mus. p. 390 (1927) has pointed out, is not the said species of Ransom, but certainly a new species, for which I propose the new name above.

(Spiruridae)

Mollusca.

† *Acrochordiceras* Waagen, Pal. Ind., ser. XIII, vol. II. p. 89 (1895), still in use e. g. in: Krafft and Diener, l. c., ser. XV, vol. VI, No 1. p. 129 (1909), and in: Fossil. Cat. I, Anim., pars 8 (Diener, Cephalopoda triadica) p. 27 (1915) (nec † *Acroch.* Hyatt 1877) I rename † *Acrochordiceroides* Strand n. n.

(† Cephalopoda Ammonoidea)

† *Agoniatites* Meek, Rep. U. S. Geolog. Explor. forthieth Parall. 4. p. 99, nota (1877) has in the Fossil. Cat., pars 1 (Frech, Ammoneae devonicae) p. 13 (1913) been suppressed in favour of the name *Aphyllites* Mojsisovics in spite of this last name dating from the year 1882 (in: Abhandl. geol. Reichsanst. 10. p. 181 (1882)); the reason is said to be that *Agoniatites* is to considered as "sachlich irreführend"! Fortunately the Rules of the Zoological nomenclature do not allow changements of names for such reasons!

(† Clymeniidae, Ammonoidea)

† *Algerites* Pervinquièrè, Mém. Soc. géol. France, Paléontol. No. 42. p. 46 (1910) is omitted in the "Nomencl. anim."

(† Hoplitidae, Ammonoidea)

† *Amarassites* Welter in J. Wanner, Palaeontologie von Timor I. p. 49 (Stuttgart 1914) is omitted in the "Nomencl. animal."

(† Ammonoidea)

† *Anisarcestes* Kittl, Denkschriften Akad. Wiss. Wien 81. p. 507 (1908) is omitted in the "Nomenclat. anim."

(† Ammonoidea)
